Otis **Z**

The Z is the industries first...

A true cotton & foam futon that works on a tri-fold frame and can be compression packed to lock in the comfort in a small UPSable box! Many Otis futons are designed to work on bi-fold convertible platforms, frames or platform beds! This unique fiber futon is different than our Cazenovia, Jamison, and Niagara because these are more foam than cotton (fiber). The Z is 70% cotton (fiber) and 30% foam... and it still comes back to life after being compressed! Other brands of cotton and foam futons just get flat with time... Otis futons actually keeps its shape... even after compression!
