## **DOES SIZE MATTER???**

*You guessed it...of course it does!!! Did you ever try to squeeze into your favorite pair of jeans...from 2 years ago? Ok, so you gained a pound or two plus you went from a size 6 to a size 8. You have a couple options...diet, buy clothing the correct size, or try to fit in the incorrect size. FUTONS ARE NO DIFFERENT! I know we have all done it...put an Otis high performance Moonshadow (that is a true full size mattress with an 8" border) in a cover that is supposed to a futon that ranges between 6 and 8". Logically speaking, it will never fit properly. Like your jeans, it will fit, but SNUG and change the feel of the mattress! Our industry desperately needs to catch up to the mattress industry and design "high profile futon covers" instead of the one-size fits most covers. The futons of yesteryear could all fit into one size because there was no way to measure the true thickness of any mattress. Otis has challenged the industry once again to GROW and increase the image of the FUTON!*

Isn't it time you believed in this product fully and promote the futon as a mattress. Raise the expectations of your consumers and let them experience a futon in every room!
